

Boehringer-Ingelheim rolls out iRISK™

Aiming at Operational Excellence with Risk Management

In pursuit of Operational Excellence, Boehringer Ingelheim has chosen iRISK™ as the next step in Risk and Knowledge Management across its biological products and processes lifecycle. iRISK™ proprietary platform, with seamless alignment to Boehringer Ingelheim's logic was found by users and management as the best fit to achieve the company's goals on Quality Risk Management (QRM).

“We found iRISK™ to be well aligned with our internal processes and together with 4Tune Engineering's efficient technical support, we felt this to be the right platform for us.” – said Jan Visser, Head of Bioprocess Development Biologicals. This decision further strengthens the company as a leader of QRM in the industry and is well in-line with the current and upcoming regulatory landscape.

“We are very pleased with Boehringer Ingelheim's decision and the Go-Live of our award-winning QRM platform. The addition of one more industry leader to our iRISK™ portfolio validates our commitment to provide the Pharmaceutical Industry with best-in-class solutions specific to our client's requirements.”, highlights José Menezes, CEO of 4Tune Engineering, adding: “iRISK™ is the culmination of our decade-long knowledge and innovation in this field. Our iRISK™ customers can expect a QRM platform that integrates all risk management tools they need throughout the lifecycle and a platform that integrates seamlessly into their own systems to provide analysis and decision-support tools to manage risk in a global and complex organization to enhance their Quality & Knowledge Management Culture.”

On October 2018, Boehringer Ingelheim began leveraging the powerful iRISK™ platform and took another step to be future-ready.

About Boehringer-Ingelheim

Improving the health and quality of life of patients is the goal of the research-driven pharmaceutical company Boehringer Ingelheim. The focus in doing so is on diseases for which no satisfactory treatment option exists to date. The company therefore concentrates on developing innovative therapies that can extend patients' lives.

About 4Tune Engineering & iRISK™

4Tune Engineering is a leading company in Manufacturing-Sciences & Technologies (MSAT). Providing advanced, intelligent and industry-proven 4.0 solutions over entire process and product lifecycles, it has been a partner to top pharmaceutical companies in Europe, North America and Latin America for over a decade.

iRISK™ is the next generation of Quality Risk Management Platforms as it enables risks to be identified, quantified and prioritized through the platform and can create risk mitigation strategies over the lifecycle for new or existing products and processes. It was fully developed by 4Tune Engineering to ensure that risk activities are aligned with Business Processes while meeting all regulations (e.g. ICH, WHO, FDA, EMA).
